

Exterior Lighting Design Assistance Form

Please fill out and return the following form with as many of the following questions answered. The more questions that are answered, the more accurate the design will be

Your Name, Company And Contact Information:

General Information:

What is the name of the project?

Where is the project located?

When are the designs due?

NOTE: A minimum of one business week (five days) is requested, but no required, on all lighting designs. Most designs will be completed and delivered before the minimum requested time. Please allow for more time on larger projects. This due date does not account for any and all design revisions. Please plan accordingly.

Drawing Information:

Drawings and documentation: (If yes, please send a copy to CT Lighting Sales)

a. Are there Autodesk Revit or AutoCAD drawings of the building?

b. Are there PDF documents, PDF drawings, or printed drawings of the building?

If yes, please provide a copy for CT Lighting Sales to use. If no, the site can be drawn using Google Earth and (if possible) a site visit. Hand drawings of the site are also acceptable. If the luminaires are to replace existing ones, please also insure the location of existing luminaires is noted on the drawings

Lighting Information:

How and where are the luminaires to be mounted? All luminaires must include pole/mounting heights.

Should reflectance values be considered? If yes, please specify reflectance values.

YES

Reflectance Values

Standard reflectance values will be used if none are given. Please specially request for vegetation (trees, shrubs, etc) to be included in the calculations

What are the minimum light level requirements for the space?

FC

Use IES Standards

Please provide any other relevant information about the design below:
