

SPOTLIGHT

acouStaCorp *Acoustical Products*

Established in 2009, acouStaCorp provides solutions for addressing spaces with multiple and conflicting acoustical requirements. We are industry leaders, innovating with continual R&D efforts, to deliver World Class acoustic performance for our clients. Certified ASTM C423 tests coupled with our superior quality controlled manufacturing process, project management and product support provide important tools for design professionals

Variable acoustic banners change room reverberation time, improving the listener's experience as they increase the value and flexibility of public assembly spaces.

MOTORIZED RETRACTABLE BANNERS

Tune your room for every performance

acouStac® - Stacking style allows for customizing to achieve greater widths and lengths

acouRoll® - Roll style is compact and economical, and retracts fully into enclosure
