

# SPOTLIGHT

ERCO has expanded its range of exterior lighting with the Castor bollard. Designed to create a large beam spread and comfortable viewing, the Castor bollard is adaptable and beautiful. The Castor is available in both an asymmetric and symmetric beam spread and in both warm and neutral white and in a range of wattages and lumens.

ERCO has developed a bollard that takes into consideration both the visual comfort of viewers' and proper illumination cutoff. The Castor features an anti-glare cone that is made of a corrosion-resistant cast aluminum and has been double powder-coated and black lacquered to eliminate glare from above the light aperture and has ERCO Dark Sky technology to prevent light from being emitted above the horizontal plane. The wide-angle of the beam spread allows for wider spacing while maintaining an even illumination. The Castor can cast 360° to allow for a wide cast of light, or 180° in order to prevent light trespass.

**Controls:** Switchable or DALI

**Power Rating:** 8W, 12W, 16W, 24W

**Luminous Flux:** 840lm, 1100lm, 1260lm, 1650lm, 1680lm, 2200lm, 2520lm, 3300lm

**Light Color:** Warm White, Cool White

**Lumen Maintenance:** L80/B10 50000h

**Color Rendering Index:** CRI>80-CRI>90

**Color Deviation:** SDCM<2
