## F34 - EYES From Fabbian

The F34 – Eyes from Fabbian is a beautiful family designed by Matali Crasset that will soon be available in the US. Crasset took inspiration from the simplistic glass ball profile, adding intensity through three concave cones to create depth and energy to the classic form.

The series itself will be available in two glass forms and three mounting styles. The fixture is available as a direct ceiling mount, pendant mount and table lamp, all of which measure at a general glass height of 35cm (around 13.75"). Eyes is available in either a clear glass, which accentuated the ribbing inside the concave portions of the glass to create unique light and dark lines in the fixtures, or in a diffused white, which provides a softer glow.

The family works together to create a uniform look in a space, and is suitable as accent lighting in residential, hospitality and retail locations.
