

SPOTLIGHT

LUNETTA From Amerlux Lighting

“Conventional exterior lighting, no matter how utilitarian or thoughtful the design aesthetic, involves a bright luminaire and a dark pole. “Lunetta” breaks from convention by allowing both luminaire and pole to become illuminated as one.

A straight round aluminum pole emanates from the ground and begins to flare until gracefully reaching the recessed light source running around the perimeter.

The LEDs graze light down the face of the flared luminaire and post creating a comfortable yet efficient lighting element.”

– Amerlux Lighting

The Lunetta is a revolutionary new fixture in exterior lighting. By embracing the concept of a pole and fixture as one illuminated piece, the Lunetta provides event, soft downlight without harsh lines caused by traditional exterior post-top fixtures. The Lunetta series is a combined fixture and pole, available in a 10”, 18” and 28” diameter top and 2.5”, 4” or 5” round poles for varying levels of illumination and visual aesthetic for the space.

The Lunetta series produces between 1,400lm-4,600lm in 4000k depending on the fixture diameter and offers a type 5 distribution pattern for overall illumination around. The series is an modern, sleek design for both roadways and pedestrian ways and can work with an area to be both a functional and architectural detail in an exterior space. The fixture is made from aluminum and can be powdercoated with a thermoset polyester finish for durability against exterior elements.
