

SPOTLIGHT

PLUMEN BULB AND PENDANT

Plumen is an European-based lighting company of reimagined CFL light bulbs, designed by HULGER and Bertrand Clerc.. Their collection of forms includes the original 001, a softer 002, and a smaller baby 001, with an upcoming LED version of the 002. The form is unlike what has been seen on the market, but is instantly recognizable. Different from each angle, the Plumen bulb works as a 3-D statement of light in any fixture.

Though the Plumen bulb has been used in a variety of applications, it shines best in their Drop Cap pendants. These simplistic-yet-bold pendants are a smooth metal with a variety of finishes and a matching nylon cord.

The Plumen bulb and Drop cap set make a statement on their own, or in installed in groups. You can install one to create warm accent lighting, or a group to make a statement chandelier. Plumen is as adaptable as it is beautiful, and will make a unique statement in any space.
