

SPOTLIGHT

RSW SERIES From Cree Lighting

The RSW is the newest fixture in Cree's outdoor portfolio. The cobra-head style fixture utilizes Cree's proprietary WaveMax™ Technology to provide efficacious light without glare. The RSW is ideal for a variety of applications including campus lighting, residential lighting and intersection lighting, as well as general street illumination.

The RSW's WaveMax™ Technology eliminates glare through an innovative optical waveguide platform that features up to 90% optical efficiency with precise optical control. It also allows the RSW to provide a warm 3000K color temperature and 80 CRI without dramatic efficiency losses.

The RSW also comes with Cree's 10-year limited warranty, ensuring that the fixture will provide efficient light for years to come.
