ILLUMINATED MIRRORS

Solavanti Lighting

Solavanti Lighting is a contemporary lighting company specializing in contemporary European design. Through their architectural lines, LTS, Baulmann, Solavanti and LAMP, they're able to create modern, specification-grade lighting solutions.

One of the unique options from Solavanti is their uniquely crafted illuminated mirrors. The mirrors are illuminated with warm LED's to create a beautiful glow and even illumination to the user. The Mirrors use a 12 volt Flex-LED in order to create illumination while maintaining a thin profile.

The mirrors are available in a range of sizes and shapes, ranging from small 8.7" enlargement mirrors to large-scale 31.5"x47.2" illuminated mirrors. They come in multiple shapes included rectangular and round, and lighting on two or four sides.
