## Modo Luce Atollo

Loffko Group is a premier importer of decorative lighting products, representing Modo Luce and Lumen Center Italia. Their imported lines showcase high-quality European design with modern aesthetics. Their fixtures use form, scale and color to provide a decorative element to both residential and commercial spaces. One of the expanded lines created by Modo Luce is the Atollo series of decorative and structural fixtures designed by Paolo Grasselli.

The large-scale fixtures combine fixture and furniture, available as both a standard luminaire and illuminated tables, made of white polycarbonate lensing and chrome-plated metal structures. The Standard Atollo fixture is a circular form with a hollow center, available as a suspended, ceiling mount or wall mount fixture. The fixture is available ranging from 8" to 59" in diameter, with a semi-circular form available in 55" diameter.

The Atollo is also available as a dual-use furniture and fixture mix. The Atollo Tavolo and Atollo Happy Hour are tables, featuring different toppers on the circular form to provide a place to rest items on.

The Atollo Tavolo is a short table, with a colored cushion to coordinate to a space, and the Happy Hour is a small, bar-style table with a painted metal tray topper. The Atollo Panca is a seat-style fixture what can wrap around circular forms. The entire Atollo series is available as either an E27 base or 3000k LED strip. The fixture ranges from IP20 to IP31, and is CE Listed only.
