

SPOTLIGHT

INTRODUCING OUR NEW LINE

Ketra's integrated system of lighting, controls, and software allows for easy deployment of Natural Light in the built environment.

From the energizing midday sun to the familiar, soothing glow of a candle, Natural Light changes throughout the day, following the formula created by nature, synchronizing our circadian rhythms so that we live healthier, happier, more productive lives.

As we spend more and more time indoors, in front of screens and away from natural sunlight, our bodies aren't receiving the stimulus they need to maintain proper health and rest. Ketra brings Natural Light into the built environment, and influences our overall wellness where we live and work.

Founded in 2009, Ketra has made dynamic light accessible in any environment with a flexible, fully integrated lighting and controls solution. Ketra's tunable light creates high quality white, pastels and saturated color from a single-point source, enhancing the look of any space, and allowing you to tailor your light to meet your specifications.

LIGHTING

Lamps & Luminaires

- Ketra makes lamps and luminaires for commercial and residential applications
- General illumination for large or small applications
- Decorative and task lighting for accent fixtures
- Every Ketra product contains a custom driver chip, delivering perfectly calibrated light for the lifetime of the product

High quality Light

- No Color Shift: Ketra's patented closed loop feedback compensates for optical and thermal shift in LEDs
- 90+ CRI from 2,700 to 6,500K
- No color break up or multicolored sources: Ketra's lighting platform is a single source of perfectly mixed light

CONTROLS

Scalability

- N4 hub connects to router and wirelessly controls lighting using your Ketra mobile app
- Multiple hubs cascade to support larger networks
- Standard control interfaces (DMX, contact closure, 0 - 10)
- Application Programming Interface (API) enables integration with wide variety of control, automation and Internet of Things (IoT) projects

Customization

- Keypads are a sleek and convenient control option that disappear into the wall and fit within any environment and style
- Configurable buttons, material colors and customizable text options provide endless creative possibilities for your space
